

**Amendments to the Specification:**

On page 30, please replace the paragraph beginning at line 18 with the following amended paragraph:

--As before, the content source 114 searches 1306 for related supplemental content 406. If related supplemental content 406 is found 1308, the content source 114 filters 1310 the search results 504 and supplemental content 406 according to the user preferences 614 and/or user profile 704. If, however, related supplemental content 406 is not found 1308, the Internet 126 is searched 1312 for related supplemental content 406, which is likewise filtered 1310 ~~[[1314]]~~. Thereafter, the content source 114 sends 1314 the filtered search results 504 and supplemental content 406 to the user's STB 102 where it is cached 1316 in the storage device 310.--

On page 31, please replace the paragraph beginning at line 13 with the following amended paragraph:

--The user then selects 1322 one of the items of supplemental content 406. Finally, the STB 102 displays 1324 the selected item of supplemental content 406 on the television 104, after which the method 1300 is complete.--
